

Equine

Architecture around equine care.

AECH / CONSTRUCTION-STAGE EXTERIOR / 17 SEPTEMBER 2026

Architecture around equine care.

Campus, barn buildings and supporting spaces are considered together. The selection connects architectural studies with original construction-stage exterior photographs.

01

Campus thinking

Buildings, open areas and the connections between them.

02

Building character

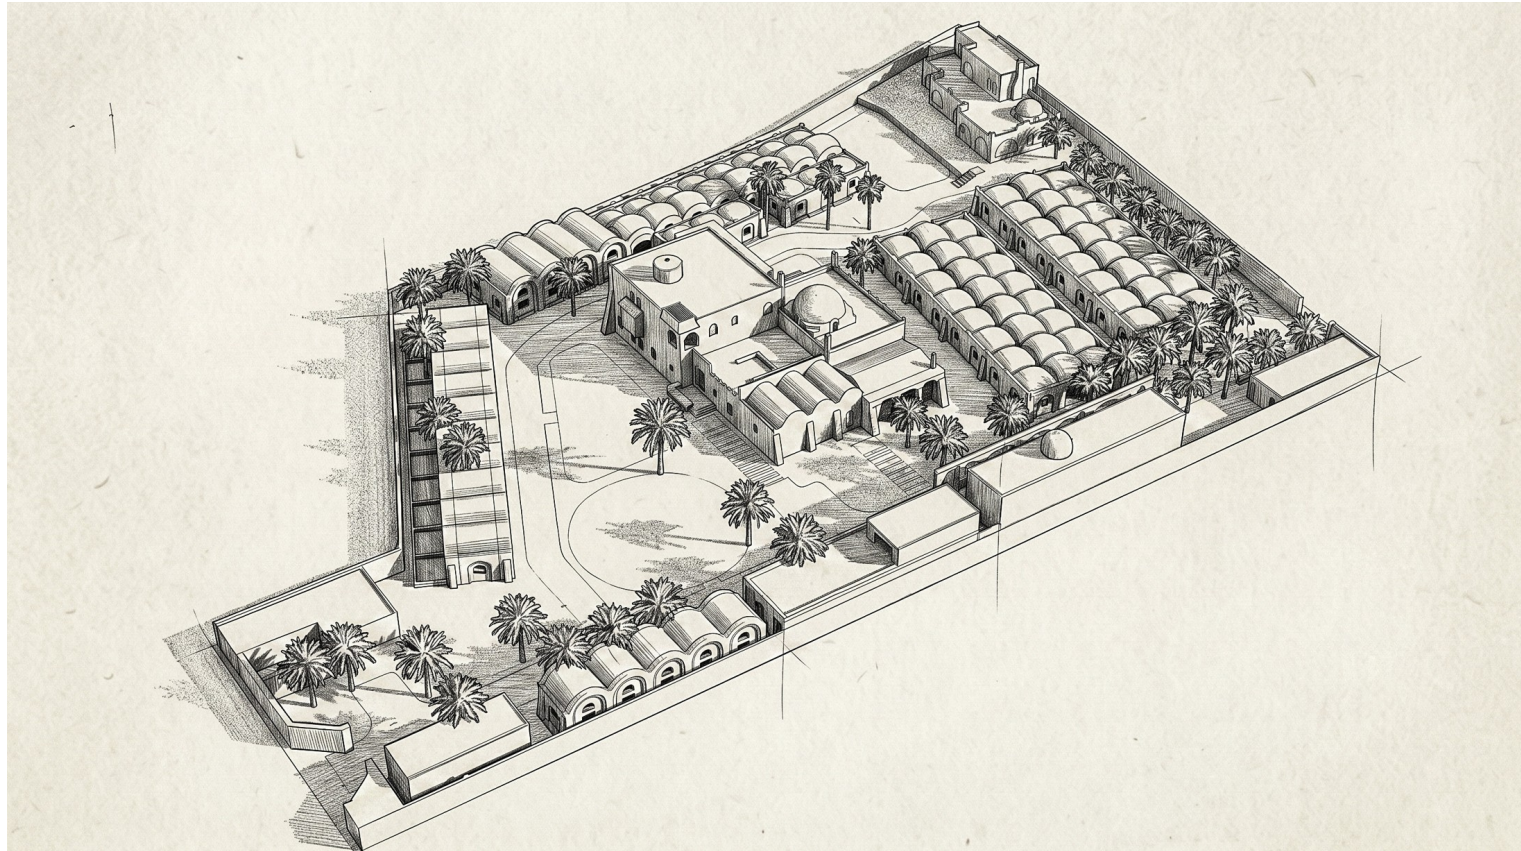

Repeated bays, arched openings and covered form.

03

Coordinated delivery

Specialist requirements and site-stage services are defined within the project appointment.

The campus as a whole.

BUILDINGS

Repeated building forms establish the campus structure.

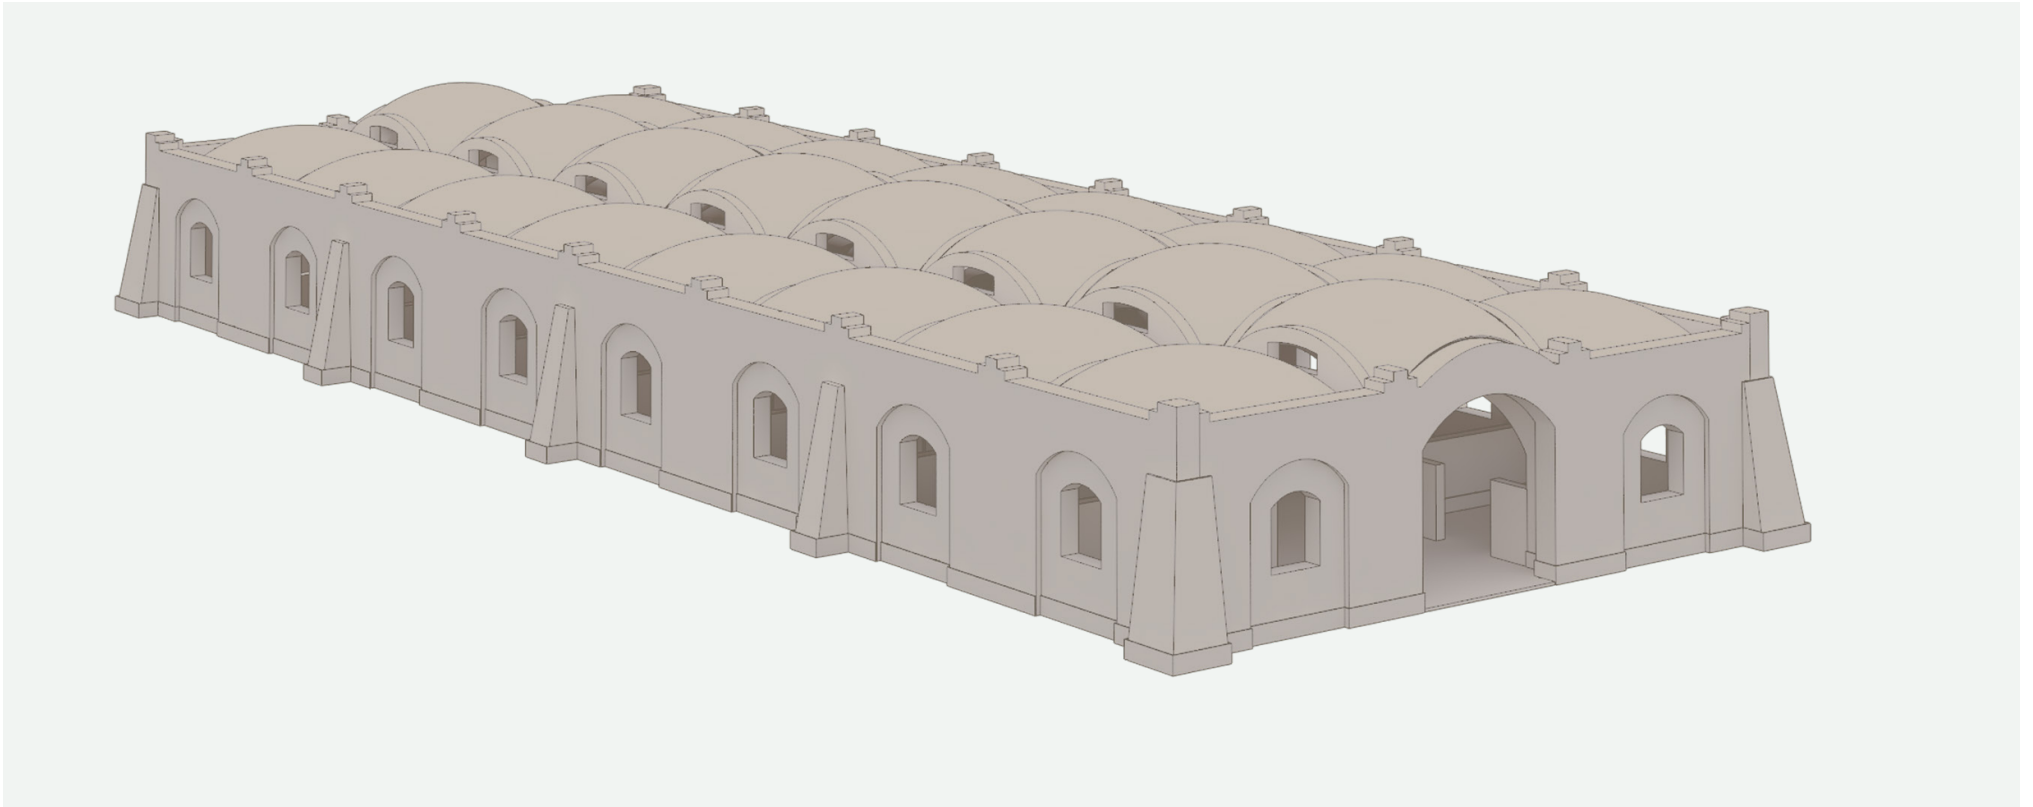

BETWEEN BUILDINGS

The concept considers open areas and connections alongside the buildings.

DESIGN STAGE

Illustrative campus concept; not an as-built survey.

A building system, repeated.

FORM / OPENINGS / ACCESS

Repeated arched openings and vaulted bays establish the barn architecture. The study explains building form; it does not record construction completion.

Architecture on site.

Exterior works / 17 September 2026 / original site photograph

Vaulted forms and repeated arches are visible on site while finishes and external works remain in progress.

The roof at close range.

CONSTRUCTION RECORD

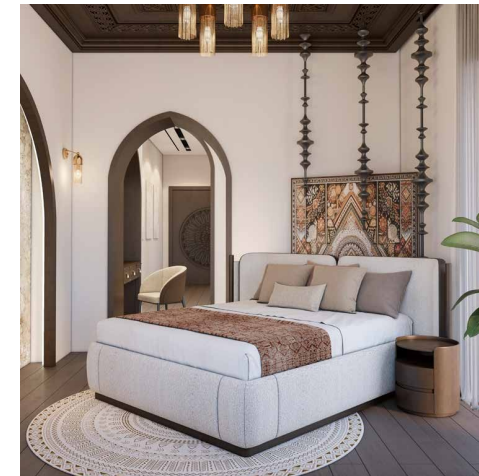

Close views show curved roof surfaces and exterior work in progress.

SITE FOLLOW-THROUGH

Dated photographs connect the architectural discussion with the visible stage on site.

Original site photographs / work in progress, not completion or certification

People within the campus.

SUPPORTING SPACES

Shared living and private rooms support the wider campus. These are review-stage interior studies.

Living / kitchenette and bedroom / design visualisations

Three complementary responsibilities.

Ahmed Abd Alkader

DESIGN LEADERSHIP

Design direction and the client dialogue.

Sami Halawa

CONSTRUCTION + PROJECT MANAGEMENT

Programme, coordination and site-stage decisions.

Hassan Abd El Kader

TECHNICAL DELIVERY + PROCUREMENT

Documentation, tendering, materials and procurement.

Specialist appointments and site attendance are defined to suit the agreed project scope.

What you see is what you get.

Let's discuss your equine facility and specialist requirements.
